

# ORBIS +

## WHY NOT BOTH

The best of both worlds. Road and gravel. While the Orbis is a pure sealed road machine, Orbis + is the split personality. Hitting the end of that sealed road, only now pushing on and discovering where the gravel continuation actually ends. Taking the latest – wider – rims, we designed the Orbis + around the demand for a platform that would allow for bigger tyres while still maintaining the soul of a road bike.

A semi-integrated headtube and Enve road disc fork compliments the flat mount disc brake and formed chainstays. All still built around a road groupset. Wider bars and a shorter reach help provide greater control and tyres up to 40mm (measured) ensure you have all the grip you need. The term “quiver killer” is cliché...except that this truly is a ‘do it all’ bike. The Plus is made to be just as at home with our carbon fenders as it is peeling turns in the local bunch ride. The only issue is what to do with all the other bikes it, just made redundant.

**Type:** Road / Gravel / Commute

**Material:** Titanium fully butted

**Brake:** Disc

**Maximum Tyre Size:** 40mm measured, 34mm with guard

**Axle:** 12mm thru axle front and rear

**Finish:** Choice of any Baum painted or raw finish scheme

**Frame fuselage from \$13,450**

**Complete bike from \$16,720**

# Standard Orbis + fuselage package:

\$13,450\*

## Base Package:

- Butted 3/2.5 seamless tubing
- Choice of seven standard sizes
- 3D printed yoke
- Internal hydro routing
- Semi-integrated Cane Creek 110 headset
- ENVE all road disc through axle fork 100x12mm
- Proprietary 6/4 Ti thru axle dropouts
- Axle spacing 142x12mm
- T47 bottom bracket shell
- Enve carbon seatpost
- 3T/Enve headstem
- Compatible with Di2, AXS, EPS or mechanical
- Maximum chain ring 50/34T
- Maximum tyre size
  - 40mm measured
  - 34mm measured with mud guards
- Rack eyelets
- Choice of any Baum painted or raw finish scheme

---
