

CELARIS

TAKE A LONG LOOK

Modern and sophisticated, svelte and forgiving: the Celaris combines everything that you want from a contemporary road bike, including an uncluttered cockpit, with the elegance of a classic silhouette.

The Celaris inherits much of its DNA from the Orbis, hence its contemporary features, such as a T47 bottom bracket shell, flat mount disc brakes, and geometry that has been optimised for 28–32 mm tyres. The rest of its features, like the half-inch seatstays, 27.2 mm seatpost, and its classic physique we owe to our history in frame-building.

Those classic lines are only skin deep, though. The Celaris is a high-performance road bike that we are able to tailor and tune to suit the heaviest riders as well as the lightest, albeit with a slightly more compliant feel than the Orbis.

Type: Road

Material: Titanium fully butted

Brake: Disc

Maximum Tyre Size: 34mm measured

Axle: 12mm thru axle front and rear

Finish: Choice of any Baum painted or raw finish scheme

Complete bike only, from \$24,950
